

## English Ironwork & Wirework

# Handmade by

"We invite you to discover Garden Requisites, situated in Batheaston village near the city of Bath. Here you will find a vibrant and thriving company with a passion for design and architectural heritage, producing beautiful and functional products for your home and garden in a sustainable way that will last a lifetime."

**Hilary and John Thurman, Garden Requisites**

# British craftsmen

Design

Inspired by original architectural features and made using traditional techniques, we are constantly innovating and refining our product range to create timeless designs that will suit both period and contemporary properties.

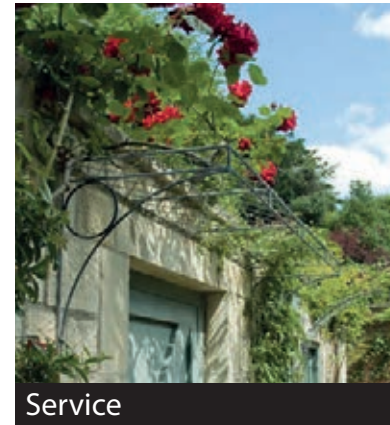

Made in Britain

We take pride in being "Made in Britain" and have developed the expertise, facilities and training for our apprentices to promote excellence in British engineering. We manufacture products in limited batches or one-off pieces.

Sustainability

Our products are made from solid steel, which is always hot-dip zinc galvanized to form a rust resistant finish that will last a lifetime. These materials are naturally occurring and infinitely recyclable; a truly sustainable solution.

Service

As award winning designers and manufacturers, we have a wealth of experience and passion for our products. We are here to help you with every aspect of your purchase and to answer any questions that you may have.

**Testimonial** We have used Garden Requisites more than once and each time found their service second to none and their products beautiful. The porch and canopy we have bought enhance our properties beautifully. We would thoroughly recommend them.  
**D. Knight and N. Horrocks, Gloucestershire**

# Scoop porches for making an

**4' Porch with curved sides**  
H8'6" x W4' x D24" (260 x 122 x 61cm)  
A 24" deep porch with solid roof, shown with curved, double framed sides.

**PH408**

**4' Porch with straight sides**  
H8'6" x W4' x D24" (260 x 122 x 61cm)  
A 24" deep porch with solid roof, shown with straight, double framed sides.

**PH408**

Porches provide an elegant covered entrance for any exterior door, ideal for wet weather. The decorative lattice side panels offer sturdy support for climbing plants, especially when combined with our matching planters. Our scoop porches are straightforward to install and are a statement piece that will add real value to a period or contemporary property. Available in a standard 24" depth you can choose from our range of straight wirework sides, curved wirework sides or circular steel columns. All porches are made in three sections - the roof and two sides - for easy assembly on site. Available in Aged zinc galvanized finish or painted Black or Grey. Contact our office or visit our website for measuring advice.

# entrance

**6' Porch with curved sides**

H8'6" x W6' x D24" (260 x 183 x 61cm)

A 24" porch with solid roof, shown with curved double framed wirework sides.

**PH410**

**8' Porch with columns**

H8'6" x W8' x D24" (260 x 244 x 61cm)

A 24" deep porch with solid roof, shown with columns.

**PH416**

Front elevations show the double framed detail of the front wirework side supports and the double frame below the top leading edge of the solid steel roof canopy.

Side elevations show the straight wirework, curved wirework and steel column options.

Orderline: 01225 851577

**Testimonial** We needed a porch over our doorway to give it some added protection. We didn't want a tiled timber porch or a double glazed one, so when we found Garden Requisites, we knew this porch was the perfect design for us.

**Mr & Mrs Cassidy, Surrey**

Scoop Porch with curved wirework sides in Aged galvanized finish - 4' wide x 24" deep

Bespoke Ironwork Porch in Aged galvanized finish

# Ironwork porches

**4' Ironwork Porch**  
H8'10" x W4' x D30" (269 x 122 x 76cm)  
A 30" deep porch with solid roof with curved ironwork sides.

**6' Ironwork Porch**  
H8'10" x W6' x D30" (269 x 183 x 76cm)  
A 30" deep porch with solid roof with curved ironwork sides.

All our porches can be made to order in any size, but for a larger property or a wider door you may wish to consider our new Ironwork Porch which benefits from a deeper 30" roof to provide a more substantial shelter for your doorway. The elegant simplicity of this design ensures that it complements both period and contemporary houses and will add a stylish and sympathetic focal point to your property. The roof height is 24" and the depth of the ironwork sides 7" as standard. Our porches are easy to install and can be made to measure. Available in Aged zinc galvanized finish or painted Black or Grey. Contact our office or visit our website for measuring advice.

# Traditional porches

**5' Georgian Porch with iron framework**  
H9' x W5' x D24" (270 x 153 x 61cm)  
A 24" deep porch shown with iron framework.

PH421

**5' Georgian Porch with decorative framework** PH421/D  
H9' x W5' x D24" (270 x 153 x 61cm)  
A 24" deep porch shown with decorative iron framework.

**6' Georgian Porch with curved brackets** PH422/B  
H46" x W6' x D24" (117 x 183 x 61cm)  
A 24" deep porch shown with curved wirework brackets.

PH422/B

We've designed our porches to look good on any style of property, but if you are looking for a more authentic architectural feature, our traditional Georgian porches are the perfect solution. Our traditional porch incorporates design details that are inspired by original historic designs.

Orderline: 01225 851577

**Testimonial** I took my ideas and measurements down to the showroom in Bath where they worked out all the details and then gave me a quotation. Once it was ready we collected it from the workshop, installed it ourselves and here it is, perfect!

**Mr Smith, Oxfordshire**

# Circular planters

## Circular Planters

Medium	18" Dia. x H16" (46 x 40cm)
Large	24" Dia. x H20" (61 x 50cm)
X Large	30" Dia. x H24" (76 x 61cm)
Tall Medium	18" Dia. x H28" (46 x 70cm)

**PL001**  
**PL002**  
**PL003**  
**PL004**

Our circular steel planters are supplied with four solid steel feet for added stability. The base has several drainage holes to avoid waterlogged roots.

With the look of traditional lead, our circular steel planters are a lighter, maintenance-free alternative, built to withstand the damaging effects of weather, soil and water. Unlike wooden planters which will eventually rot, the zinc galvanized steel finish ages gracefully, resulting in a beautiful weathered patina. Our planters have no sharp edges or corners and are generous enough to hold sumptuous arrangements of mixed planting or bold topiary. Drainage holes in the base avoid waterlogged plants and raised feet aid stability. Made to measure available.

Orderline: 01225 851577

Our Medium Circular Planter in front of a custom made Ironwork Porch

# Square planters

## Square Planters

20" Medium H20" x W20" x D20" (50 x 50 x 50cm) **PL102**  
 24" Large H24" x W24" x D24" (61 x 61 x 61cm) **PL103**

## Square Planters

28" X Large H28" x W28" x D28" (70 x 70 x 70cm) **PL104**  
 36" XX Large H36" x W36" x D36" (90 x 90 x 90cm) **PL105**

Our latest range of Square zinc galvanized solid steel planters are perfect for larger displays of shrubs and trees. The planters are designed for external use and each planter has a raised base, substantial corner legs for stability and an elegant top rim for easy lifting. The bases also have integral corner holes to allow for any excess water to drain away to avoid waterlogged roots. The Aged zinc galvanized finish is a weathered grey zinc patinated finish, and will gradually oxidise in a similar fashion to lead. Nationwide delivery and a made to measure service is available.

# Tall planter

**Tall Planter**  
16" x 28" Tall H28" x W16" x D16" (70 x 40 x 40cm) **PL201**

A series of our planters in front of The Ivy Tower Bridge, London.

This Tall Planter is the perfect design and proportion to sit either side of your doorway, providing plenty of room for the roots of larger plants or standards such as the Bay tree. Unlike wooden planters which will eventually rot, or GRP which will crack and fade, our superior solid steel planters will last a lifetime. The superior fully welded construction and aged zinc galvanized finish will age naturally resulting in a beautiful weathered patina. Our planters are made by us and are fully welded, no self-assembly with many unsightly nuts & bolts.

Orderline: 01225 851577

# Troughs

**36" Medium**  
H20" x W36" x D16" (50 x 90 x 40cm)  
**48" Large**  
H20" x W48" x D16" (50 x 122 x 40cm)

<b>PL301</b>	<b>36" Medium Tall</b> H28" x W36" x D16" (70 x 90 x 40cm)	<b>PL303</b>
<b>PL302</b>	<b>48" Large Tall</b> H28" x W48" x D16" (70 x 122 x 40cm)	<b>PL304</b>

Our solid steel troughs are made by us in Bath, then hot dip zinc galvanized for a very long lasting finish. The troughs are fully welded, requiring no self – assembly, and sit on four corner legs creating a raised base for air circulation. These troughs are heavy duty, stable and have no unsightly nuts and bolts. The large capacity is ideal for instant mature hedging or abundant plant displays – perfect screening for courtyards or roof terraces. The Aged zinc finish looks like lead and weathers in a similar fashion. Made to measure sizes available, please contact the office for more information.

PL404

The Trellis Trough provides an instant screen and generous planting opportunity for mature shrubs and climbers. Privacy and effective division for courtyards, balconies and rooftop gardens are achieved by using one or more to create the desired effect. Our heavy duty, long lasting planters are shown in the Aged zinc galvanized finish and can be made with the diamond woven trellis as shown, or square patterned trellis. The trellis is easily secured inside the back of the planter. Made to measure sizes available and painted, profiled trellis panels to suit your requirements.

# Arches a great support act

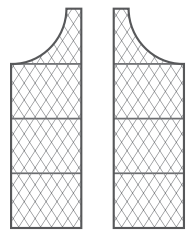

Practical and whimsical, arches are a romantic addition to your garden. A lattice arch can display an array of fragrant flowering climbers over a seating area, gate or walkway, an essential feature in any garden. We have created a system of matching weather-resistant, maintenance-free lattice panels and posts that can be used in conjunction with arches to decorate, define or screen different areas of your garden.

# Wall trellis

Unlike wooden trellis which needs treating against rot and has to be replaced regularly, our light but strong wall trellis panels provide an elegant, maintenance-free alternative that will last a lifetime. Providing a stylish yet unobtrusive support for climbing plants, they can also be used to soften, decorate or disguise garden walls or the exterior of your property. Our panels are designed to work individually or together as a scheme. Each wall panel is held away from the wall by welded tubular steel spacers allowing the free growth of twining and climbing plants. We never use unsightly plastic components with any of our trellis panels. Wall panels can be made to measure.

Straight Aged zinc galvanized finish panels in a Connecticut garden, USA

# Panels & posts

A range of wirework panels and matching posts enables you to enclose, divide or screen different areas within your garden. The superior alternative to wooden trellis or timber fencing, these wirework lattice panels are corrosion-resistant so your precious plants can be left undisturbed for years. Use our complete system of inter-working panels and posts, in combination with matching arches and wall trellis, to create a robust but stylish framework for your climbing plants. The posts can be concreted in to the soil or made with base plates to bolt down on to hard surfaces such as flagstones or even timber decking. All fixings are high quality galvanized steel; we never use inferior plastic components.

Straight Wall Top Panels and Wall Top Posts in Aged galvanized finish

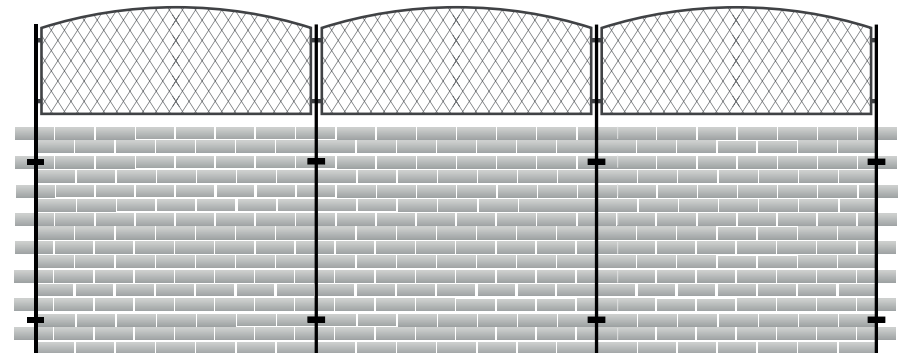

# Wall top panels & posts

Our wall top panels and posts can be attached to the top of your garden walls to improve your privacy and create an attractive division between you and your neighbours. Unlike wooden trellis, they are maintenance-free and when covered with flowers and foliage create a barrier that offers the perfect balance between picturesque and private. Lighter than timber yet more durable, our trellis panels are the perfect solution for additional screening above your timber, brick or stone wall. Graceful, yet strong enough to support heavy climbers, these panels are easy to install. Most customers need made to measure trellis to fit their specific site conditions, so please get in touch with your dimensions and preferred panel designs and leave the rest to us as we provide a design service as standard.

Convex Wall Top Panels and Front Fixing Posts in Aged galvanized finish

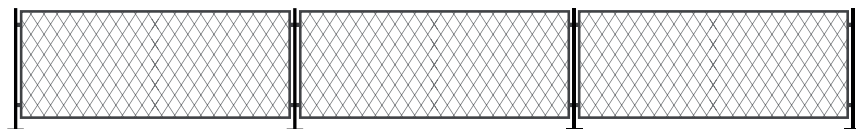

Convex Wall Top Panel  
Convex Panel H24" x W5' (61 x 152cm) WT301

Front Fix Post  
Height 50" (127cm)

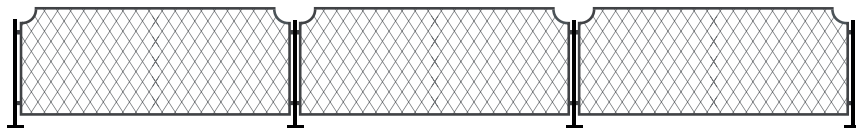

ST005

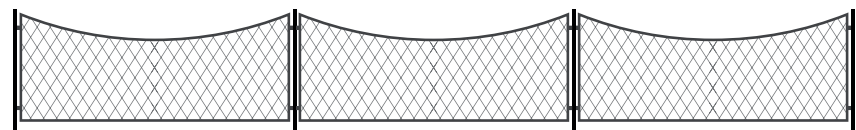

**Straight Wall Top Panel**  
Straight Panel H19" x W5' (48 x 152cm) WT001

Height 20" (51cm) ST004

**Scallop Wall Top Panel**  
Scallop Panel H19" x W5' (48 x 152cm) WT201

**Wall Top Post**  
Height 20" (51cm) ST004

**Concave Wall Top Panel**  
Concave Panel H19" x W5' (48 x 152cm) WT101

**Wall Top Post**  
Height 20" (51cm) ST004

Wall Top Post

Wall Top Panels are supported by top fixing or front fixing posts made from solid steel bar. Designs can vary greatly depending on your existing wall design, material, orientation, levels, corners, varying heights, capping stones etc. Standard top fixing posts have a flat 4" footplate; front fixing posts have a pair of fixing brackets for bolting flush to the wall.

Made to measure Wall Top Panels and custom Front Fixing Posts in new Light Bark paint finish

# Contemporary Fireguards

**26" Small Fireguard**  
W26" x H28" x D10" (66 x 71 x 25cm)  
**34" Medium Fireguard**  
W34" x H28" x D10" (87 x 71 x 25cm)

**FG201**  
**FG202**

**42" Large Fireguard**  
W42" x H30" x D12" (107 x 76 x 30cm)  
**48" X Large Fireguard**  
W48" x H30" x D12" (122 x 76 x 30cm)

**FG203**  
**FG204**

In addition to the four standard sizes shown above, we can also make bespoke sizes to suit most stoves and fireplaces – please see the main image on the left for a typical bespoke design. Many stoves are not set in a fireplace, so the guards have to be much deeper to extend to the back wall. Optional wall fixings are available to ensure maximum safety. Made from fully welded solid steel before being hot dip zinc galvanized, they require no self-assembly and the closely spaced vertical rods are only 2"/50mm apart. Available in Anthracite Grey painted finish. Bespoke sizes available.

# Traditional Fireguards

**26" Small Fireguard**  
W26" x H28" x D10" (66 x 71 x 25cm)  
**34" Medium Fireguard**  
W34" x H28" x D10" (87 x 71 x 25cm)

**FG101**

**42" Large Fireguard**  
W42" x H30" x D12" (107 x 76 x 30cm)  
**48" X Large Fireguard**  
W48" x H30" x D12" (122 x 76 x 30cm)

**FG102**

**FG103**

The Traditional Fireguard offers authentic protection for your wood burning stove or your fireplace. The rigidity of our design set our fireguards apart from inferior folding models; the top rail is gently curving so no sharp edges, the woven mesh a small 2" x 1" diamond, too small for hands or whiskers. We can supply optional side fixings for extra security and can also make to measure. Most stoves require a deeper guard to extend back to the wall, as shown in the deeper bespoke design in the image shown above right. Available in Black painted finish or Aged zinc galvanized finish.

Orderline: 01225 851577

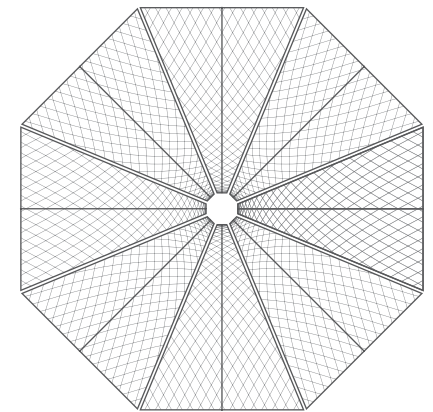

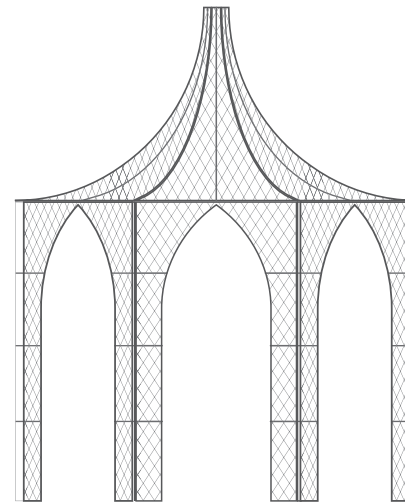

42" wide Large Fireguard in Aged galvanized finish

# Gazebos

Create a special outdoor space for afternoon tea or garden parties in the summer, or simply provide a magnificent focal point for a larger garden with one of our wirework gazebos. Swathe in climbing plants for beautiful blooms and shady foliage in summer, or create a romantic rose arbour by adorning with scented ramblers. We offer a range of arch, window or full lattice side panels so just describe your dream gazebo and we'll design it especially for you. Each corner post has bolt-down feet to secure on to a flat, level surface and the gazebo is very straightforward to install.

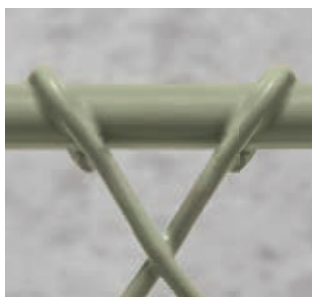

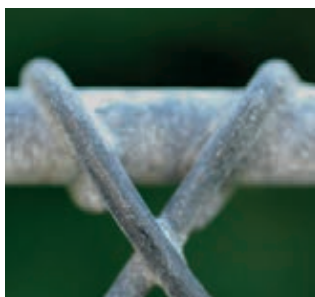

**Octagonal Gazebo** **PA101**  
H11' 2" x External diameter 10' (340 x 305cm)  
Shown with Arched Gothic side panels.

**Plan view**  
The Octagonal Gazebo is made in separate sections for easily bolting together on site.

# Finishes

Every 90 seconds across the world, one tonne of steel turns to rust, so we hot dip zinc galvanize our products to BS EN ISO 1461 to form a corrosion resistant and maintenance-free product that will last a lifetime. All products in this brochure are available in Plain zinc finish, Aged zinc finish and the standard paint colours shown below. Paints are matt finish for canopies and porches; satin finish for wirework trellis. We never use gloss paint!

Plain Zinc Galvanized

Fresh zinc has a bright silver sheen which will gradually weather to a beautiful matt, light grey finish.

Aged Zinc Galvanized

We reproduce the ageing process by etching the fresh zinc to achieve a darker, weathered patina.

Light Bark

A mellow hue with a hint of green, similar to the bark of a Bay tree. The perfect colour for trellis and arches.

Grey

An appropriate colour choice for canopies to complement exterior leadwork or slate.

Black

A traditional and timeless choice for porches and canopies that works with most properties.

# Showroom

Open weekdays 9am - 5pm and Saturdays by arrangement.

To fully appreciate the beauty and diversity of our handmade English wirework and ironwork please visit our showroom near Bath. Here you will see our unique range of products and finishes and where we can assist you in finalising your product ideas.

# How to order

To place your order please call 01225 851577. Our lines are open from 9am - 5pm Monday to Friday. Alternatively, please email your requirements and we'll contact you to process your order. We can answer your questions regarding design details, dimensions, finishes, timescales and delivery options before you place your order.
